## 4. Median of Two Sorted Arrays

Given two sorted arrays nums1 and nums2 of size m and n respectively, return **the median** of the two sorted arrays.

The overall run time complexity should be O(log (m+n)).

## Example 1:

**Input:** nums1 = [1,3], nums2 = [2]

Output: 2.00000

**Explanation:** merged array = [1,2,3] and median is 2.

Example 2:

**Input:** nums1 = [1,2], nums2 = [3,4]

**Output:** 2.50000

**Explanation:** merged array = [1,2,3,4] and median is (2+3)/2 = 2.5.

## **Constraints:**

- nums1.length == m
- nums2.length == n
- 0 <= m <= 1000
- 0 <= n <= 1000
- 1 <= m + n <= 2000
- -10<sup>6</sup> <= nums1[i], nums2[i] <= 10<sup>6</sup>
